

EKG Labs™

Heartbeat of Analytical Services

EKG Life Science Solutions, LLC (EKG Labs) is an analytical service provider that supports companies developing medical device and pharmaceutical products. In fact, we are uniquely positioned to help companies with drug-device combination products navigate the complex regulatory testing hurdles associated with development. We have analytical expertise in both material science and pharmaceuticals, and understand how these two disciplines interact when it comes to combination product development.

Project Chemist

Job Description

EKG Life Science Solutions is searching for an experienced analyst to join our team and be part of a growing pharmaceutical/medical device analytical development company.

Ideal Candidate Attributes

- Bachelor's degree in a life science or related field
- 2+ years of experience working in a contract laboratory setting with a focus on pharmaceutical and medical device development and testing (or equivalent educational experience)
- Detail-oriented problem solver with strong interpersonal, written and oral communication skills
- Experience with at least two of the following techniques: HPLC, GCMS, ICPMS, GC, FTIR, DSC/TGA

Responsibilities

- Performing analytical testing in accordance with project requirements including, but not limited to, in-house protocols, client provided methods, compendial procedures and/or other Standard Testing Procedures.
- Maintaining, operating, and qualifying analytical instruments in accordance with company Standard Operating Procedures, Instrument Operation Manuals, and cGXP regulations.
- Participating in method development, validations, transfers and special studies.
- Assisting laboratory management in special projects as needed/assigned.
