

EKG Labs™

Heartbeat of Analytical Services

EKG Life Science Solutions, LLC (EKG Labs) is an analytical service provider that supports companies developing medical device and pharmaceutical products. In fact, we are uniquely positioned to help companies with drug-device combination products navigate the complex regulatory testing hurdles associated with development. We have analytical expertise in both material science and pharmaceuticals, and understand how these two disciplines interact when it comes to combination product development.

Analytical Services

- Method Development
- Method Validation
- Extractables and Leachables

Regulatory Support

EKG Labs leverages its unique knowledge of medical device and pharmaceutical development to help clients communicate and interact with other analytical laboratories as well as regulatory agencies. These include:

- Auditing Services
- Project Management
- Protocol Preparation
- Regulatory Submission Reviews
- FDA Response/Remediation

About Our Company

EKG Labs is a Woman-Owned Business located in St. Louis, MO and provides analytical services to the medical device and pharmaceutical industries. We are FDA audited and DEA approved for Schedule I-V substances. We value developing strong relationships with our clients and seek to build a foundation based on communication, knowledge and quality.
